

# *International Conference Of Young Social Scientists (ICYSS)*

***BELGRADE***  
***25-27 JUNE 2021***

## What is the ICYSS ?

*International Conference of Young Social Scientists (ICYSS), is a specific individual competition of research papers in*

*Psychology,*

*Sociology,*

*Geography,*

*History and*

*Economics.*

*International competitions play an important role in the education of gifted and talented students and open up new opportunities for spreading knowledge in science.*

*Such competitions have the relevance of student learning:*

- to do research work,*
- to show their knowledge and creativity,*
- to present and discuss their own results,*
- to formulate research reports,*
- present in foreign languages,*
- to exchange experiences with peers from other countries,*
- to meet other people and cultures.*

### WHAT MEANS FOR YOUNG PEOPLE

*Meetings,*

*Socialization*

*,*

*Learning different cultures,*

*Creating friendship with you*

*from a lot of countries*

## REGIONAL CENTER FOR TALENTED YOUTH BEOGRAD II

Center for Talents emerged as a compelling necessity for guiding talented individuals in the fields of natural, technical, social and humanistic sciences. The Center serves the need for the development of domestic science, technological and other funds of knowledge based on our own research work and application of results-based national development programs in all work areas. This approach is imposed by modern international research and development, as well as market processes, and the global struggle for competitive products, services and knowledge. Modern tendencies - maximum use of natural resources, compliance with the requirements of preservation and environmental protection, restructuring and modernization of the economy, rapid development of food production, energy, electronics, metallurgy, chemical industry, information technology - imposed the necessity of systematic detection, identification and stimulation of gifted individuals. In order to respond to current challenges of the modern education system and especially the implementation of the Programme of encouraging and training young researchers, the Center for Talents supports the work with gifted individuals in various scientific fields. The work of the Center is aimed at revealing and identifying talented individuals and, with the involvement of the scientists as teachers and mentors, providing gifted students with the conditions for their development in the scientific area of interest. Through implementation of the planned program assignments, Center for Talents strives to make a valuable contribution to the development and promotion of science through discovering talented children and supporting their engagement in scientific research.

### Program activities:

- Recognition and identification of gifted individuals is achieved through
- Implementation of the professional and education program is aimed at introducing children to the methods of scientific research and to multi-disciplinary and inter-disciplinary approach to solving scientific problems
- Implementation of research programs relies on the cooperation with institutes, universities, schools and other scientific and educational institutions and professional societies of scientific and teaching staff in order to create favourable personnel and material conditions for work in the field of natural, technical, social and humanistic sciences
- Provision of teaching materials and professional books and journals streams to encourage creativity and enable students to rely on technical and scientific literature for their research work.
- Presentation of the results achieved by the talented students is mainly achieved through organizing the City competition and collaboration in organizing the Republic competition, but also through organizing and participating in conferences, symposiums, competitions, festivals and exhibitions
- Monitoring the development and promotion of talented individuals realized by the use of the information system over a long period of time
